Message From Principal's Desk

Sunil Kumar Verma

Education goes on throughout life, creating an understanding of moral and ethical values to groove one's life on the right path. Our focus is on helping students to reach their holistic, moral character and acquiring social confidence and responsibility. The atmosphere of our school allows for each child to be treated as a matchless individual. Our teachers take their role as mentors and facilitators very earnestly. They endeavour to enable the students as they could begin to take responsibility for their own decisions, determine their own attitude and form their own opinions on life. Assistance is given to students to achieve academically and to be sound physically; socially thoughtful, and spiritual in a blissful secure environment.

I assure you that TAS is a school worthy of your serious consideration and attention. I welcome your interest in our exciting school. It gives me great pleasure to invite you to visit the school and an appointment with me or other members of staff to discuss the educational needs of your child. I'm very positive that TAS can advocate for you in this most vital decision.

We maintain the highest standards of academic excellence. To keep up with the latest trends in this kind of learning, regular workshops are held for teachers to share their experiences and ideas and to try out new ways of activity-based instruction.

As a School, we aim to encourage every child to ask questions, seek answers and apply these in his/her education and daily life. We endeavour to build self-confidence in every child with us so that he prepares himself 'positively' for the life ahead. And all this keeps the joy of learning intact.

TAS aims to build and nurture a community of thinking, compassionate world citizens, who are committed to living with responsibility, learning with enthusiasm and balancing a strong work ethos with a sense of play.

Innovative Teaching

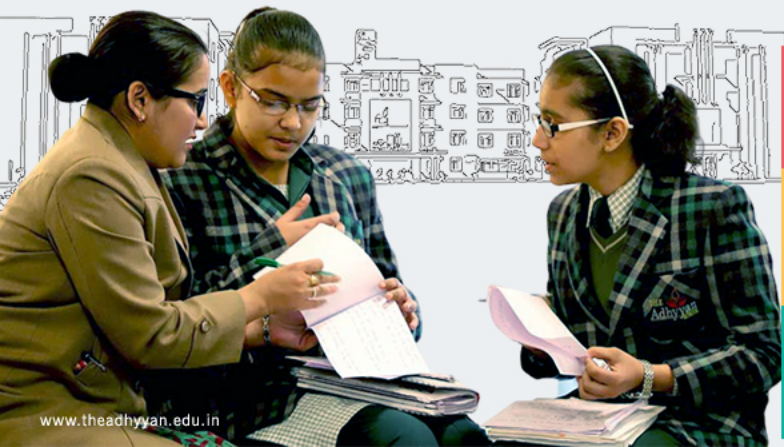

We try out new, different methods of teaching, experimenting with innovations in making learning fun. For us, "work is play".

The Project Method

Where children learn by doing is an integral part of the instructional techniques employed at our School. Students are encouraged to engage in research work for projects right from primary classes going up through the school.

Remedial Teaching

All the students in a class will never be equally good at academics. To ensure that the weaker ones do not get left behind, so to speak, a system of remedial teaching has been set up. During a remedial session, a few of the weakest students in a particular class, work with a subject teacher who goes right back to the basics and builds up from there.
